

To be one of us, you have to be yourself

Digital Transformation Specialist - determined period contract, 1 year (with the possibility to prolong)

Ingka Investments Romania (**part of INGKA Group**) - Bucharest

Ingka Investments is the investment arm of Ingka Group. The IKEA vision guides us as we lead home furnishing retail into the future. To secure Ingka Group's long-term growth and financial strength, we make responsible investments in people and businesses that make a positive difference to people and planet. Aside the Retail investments, until now we have two Investments portfolios in Romania: Forestland and Renewable Energy.

As a **Digital Transformation Specialist**, you will have the opportunity:

- to lead local Digital Projects, develop and deliver trainings for the local stakeholders,
- to develop yourself in an international working environment, communicate with different Stakeholders, from local and Ingka Group Level,
- to learn from colleagues around the world and, at the same time, to share your experience with others,
- to work in an Agile way with the digital projects.

You will also need to connect the needs in your market and at Ingka Investments level, with a complete overview of the latest digital innovation on a Forestland portfolio level.

Would you like to join us?

Here is what we expect you to do...

- Act as SPOC (Single Point of Contact) between the Management Team, Operational Team and the development/support team for any malfunction or error of the digital tools;
- Create and integrate a leaner document management system, by using SharePoint as a platform;
- Extract, Transform and Load data received from various sources into the company databases (such as SharePoint lists, Power BI reports, GIS SDE GeoDatabase);
- Maintain the database functionalities in order to serve the operational needs, to allow analyses and scenarios for producing best results under different working methods;
- Create a variety of GIS (Geographical Information System) products, such as standardized and template maps;
- Perform periodical checks over the digital tools in order to ensure functionality;
- Effectively manage all cadastral activities performed by external companies;
- Contribute at the developing of integrated digital solutions for operational activities.

... with the knowledge and capabilities, we expect you to have...

- Background with Microsoft Azure Services;
- Good knowledge of Office 365 services, especially SharePoint and Power BI;
- Good understanding and knowledge of database solutions, SQL and GeoDatabase;
- Understanding of data integration, API and automation flows;
- Understanding of Agile methodology and project management principles;
- Experience with ETL;
- GIS and remote sensing understanding – it is considered a plus;
- Document management system knowledge – it is considered a plus;
- Good communication and project management skills;
- Documentation skills of the project and the process;
- High level of proficiency in English.

*So, if you recognize yourself in the above description and if you have **University degree in Computer Science or any related field associated with this**, and at least **3 years of increasing responsibility in the field of Digital Transformation**, if you have the ability to quickly gain and apply knowledge of the local market, leading and implementing digital projects and if you have a flexible, hands-on and pro-active approach and drive to get the job done, we are curious to meet you.*

Send us your **resume** and a **short motivation letter** by **26th of June 2020** at cristina.igescu@ingka.com
Please note that only suitable candidates will be contacted.
